EDUCATION

University of Pennsylvania

Aug 2025 - May 2029

Candidate for Bachelor of Science in Engineering (B.S.E) in Computer Science

GPA: 3.93, Courses: Big Data Analytics, Programming Languages and Techniques, Calculus II, Principles of Physics

Milton Academy

Aug 2020 - June 2024

GPA: 4.0, SAT: 1570

PROFESSIONAL EXPERIENCE

Sales Patriot (YCombinator W25)

Mar 2025 – Aug 2025

Founding Full-Stack Engineer (Forward Deployed)

San Francisco, CA

- Designed and built core product features, working directly with 3 clients to automate DoD bidding workflows
- Led AI-powered email automation system to extract bid data from thousands of quotes, generating \$150,000 MRR
- As first hire, conducted sales outreach at conferences, delivered live demos, and helped close \$144K MRR in deals

Boys with the Bus LLC

May 2024 – Mar 2025

Co-Founder

- Grew social media platforms (Instagram, Tik Tok, Youtube) to over 3 million followers and 400 million views by renovating a school bus into an RV, traveling across the country, and building and floating a 3-story raft
- Generated over \$200,000 in revenue and featured on Good Morning America (2x) during gap year before college

Pacific Northwest National Laboratory (PNNL)

Jun 2023 – Sep 2024

Machine Learning Researcher

- Trained ML segmentation models to identify lithium pores and interpreted feature importance to optimize material compositions for energy storage in lithium batteries; co-author of paper published in Journal of Power Sources

Cognitive States Lab Group (Boston College, Stony Brook University)

Jun 2023 – Apr 2024

Research Assistant, supervised by Professor Amittai Aviram and Professor Owen Rambow

- Developed and implemented a database framework to represent confidence and facts in 10k news text snippets
- 31st COLING Conference Program Committee Reviewer
- Evaluated and provided feedback on 5 academic papers focused on LLM applications and machine learning in NLP

LEADERSHIP AND EXTRACURRICULARS

Hack4Impact Product Manager/Technical Lead

Sep 2025 – Present

- Created interactive learning module platform to train coaches for trauma-informed violence prevention programs

PROJECTS

Market Aid | Svelte, OpenAI, RapidAPI, Netlify

Sep 2025

- Built and deployed website to help buyers, sellers, and dropshippers find the best marketplace for their products

Employing Synthetic Satellite Data to Protect and Monitor Polar Bears

Dec 2022 – Dec 2023

- Designed novel approach for endangered species tracking by generating over 1.5 million synthetic satellite images in Blender to train object detection models to identify and track polar bears from space with over 90% accuracy
- Primary author of paper published and presented at IEEE ICARCE Conference

COVID-19 Impact on Mental Health Analysis based on Reddit Comments

Jan 2022 – Dec 2022

- Analyzed 45,000 Reddit comments by using ML Models and feature importances to identify illness reasons
- Primary author of paper published & presented in IEEE BIBM conference with MIT Professor Mikhail Shalaginov

ADDITIONAL INFORMATION

Skills: Python, JavaScript, TypeScript, Java, OCaml, SQL, Flask, Svelte, React, Supabase, Google Cloud Platform

Interests: New England Patriots, DIY Building, Traveling, Boston Celtics, Writing, Drawing, Cooking

Awards: 3rd Place at Massachusetts Science and Engineering Fair (2x), NASA Earth System Science Project Award
